EU

### EU Commission expects only a modest increase in EU pig meat production in 2018

According to the EU Commission's recently published Short-Term Outlook for EU agricultural markets, only a modest increase in the EU pig meat production is expected in 2018. The report forecasts a rise of 0.9 per cent for 2018 which will be replaced by a decline of 0.4 per cent in 2019. An 0.8 per cent fall in production was recorded for 2017.

With regard to EU pig meat exports, the report forecasts that the fall of 9.1 per cent in 2017 will be replaced by a rise in 2018 of 2.5 per cent and a fall of 5.0 per cent in 2019. The growth in exports in 2018 is a consequence of the expected increase in EU production.

Consumption of pig meat per capita in the EU is expected to remain fairly stable at 32.2 kg in 2017 and 32.3 kg in 2018 and 2019.

The table below shows the EU Commission's expectations for the EU's pig meat balance in 2018 and 2019.

	2014	2015	2016	2017 e)	2018 f)	2019 f)
<b>Carcase weight, 1,000 tons</b>						
Production	22,772	23,464	23,884	23,688	23,889	23,803

FRANCE

### AIM in financial difficulties

The French media report that the French pig processing group, AIM, is in financial difficulties and has been put under administration by a court in Rouen.

AIM has been granted an observation period of six months after which a financial plan for its future operation has to be presented.

AIM employs a workforce of 225 and experienced financial problems in 2015. At that time, the slaughterhouse was taken over by a group of employees and local organisations.

 **CHINA**
**Authorities monitoring pig and feed prices ratio**

Reuters reports that China's National Development and Reform Commission (NDRC) announced last week that they are monitoring developments in pig prices after the ratio between pig and feed prices has now entered the so-called warning zone.

According to NDRC, Chinese pig prices fell to 10.89 yuan per kg (\$1.73 per kg) in March and in certain areas of the country, the price is below 10 yuan per kg. As a consequence, the price is 33 per cent lower compared to one year ago.

With increasing feed prices, the ratio between the pig price and feed fell to 5.45 by the end of March and has now entered the authorities' warning zone of between 5.1-5.5.

NDRC has announced that they are prepared to implement measures aimed at avoiding dramatic price fluctuations in the market to help ensure stable pig production and encourage producers to produce rationally.

 **CHINA**
**WH Group hit hard by increased Chinese tariffs on US pig meat**

Asian Agribusiness reports that China's WH Group – through its ownership of America's Smithfield – has been hard hit by China's imposition of additional tariffs on US pig meat.

A CNN report states that when China's plans for additional tariffs on US pig meat became known in March, this resulted in a decrease of more than 11 per cent for WH Group shares on the Hong Kong Stock Exchange.

The CNN report also cites an independent equity analyst who says that the import tariffs may reduce WH Group profits by 12-18 per cent.

 **USA**
**China's additional tariffs have immediate impact on US producers and exporters of pig meat**

US Meat Export Federation (USMEF) has also commented on China's tariffs on US pig meat.

A statement from USMEF reads: "China's additional tariffs on American pig meat will have an immediate impact on American pig meat producers and exporters as well as on customers in China. With almost 27 per cent of US pig meat production exported last year, international trade is vital for continued success and earnings."

 **BRAZIL**
**Luis Fernando Furlan new Chairman of BRF**

The former Trade Minister, Luis Fernando Furlan, was last week elected the new Chairman of BRF. He replaces Abillio Diniz, who joined BRF after Diniz's investment company, Peninsula Participacoes, acquired a major stake in BRF.

The new Chairman is the former Chairman of Sadia SA which, following a merger with Perdigao, became BRF. Furlan was also Trade Minister in 2003 when Lula was President of Brazil.

 **BRAZIL**
**Fall in pig meat exports**

Figures from the Brazilian Animal Protein Association (ABPA) show that at 129,300 tonnes, Brazilian exports of pig meat for the first three months of 2018 are almost 16 per cent below the same period last year.

Brazilian exports have been primarily affected by the Russian import ban on Brazilian meat that has been in force since 1 December 2017.

The decline in exports to Russia combined with continuing poor domestic demand has recently put Brazilian pig and pig meat prices under severe pressure. The economic situation of the country's pig producers has been adversely affected by rising feed prices.

 **BRAZIL**
**Rise in pig slaughterings in 2017**

Citing figures from the Brazilian authorities, Agra Europe reports that Brazilian pig slaughterings increased by 2 per cent in 2017 to record figures of 43.19 million. Average weight also increased - an increase of 2.8 per cent corresponding to 3.18 million tonnes.

Santa Catarina remains the leading state with 26.6 per cent of slaughterings followed by Parana with 21.3 per cent.

As regards cattle, the authorities recorded a rise in slaughterings of 3.8 per cent to 30.83 million.

As regards chicken, slaughterings in 2017 fell by 0.3 per cent to 5.84 billion. Increased average weight, however, has resulted in an increase measured in tonnage of 2.8 per cent to 13.6 million tonnes.
